

Summit OnSite®

Keep all of your projects on schedule — and on budget — with our custom inventory management solution.

Eliminates Long Lead Times

- » By actively managing the purchase and delivery of long lead time items, we can eliminate extensive lead times on made-to-order items.

Avoids Excess Material

- » Proactive management of on-site inventory virtually eliminates excess material on your project.

Provides On-Site Material Management

- » Summit can provide qualified staff at your job site to manage the inventory and distribution of the material.
- » Unmanned material storage facilities can be provided if you have on-site personnel available.
- » Material is stored securely to eliminate shrinkage.

Generates Reports Based On Project Specifications

- » Management reports can be provided as necessary, including breakdown by material, manufacturer, customer part number, availability and requisitioning personnel name.

Ensures Set Pricing

- » Pricing is negotiated and set prior to the beginning of the project.
- » Summit works to secure the best pricing levels available from manufacturers for the duration of the project.

Includes Experienced Project Management Team

- » Summit's project management teams handle the overall implementation of the project, including order entry, scheduling and expediting.

Provides Wire/Cable Management

- » Summit's inventory management system provides effective batch management to ensure correct amounts of wire or cable are available when needed.
